To Whom It May Concern

RE: Testimonial Geos Mining

As the appointed Site Senior Executive (SSE) of several coal exploration projects in Queensland for a variety of tenement holders and operators, I have no hesitation in recommending **Geos Mining** for related project work.

I have reviewed and adopted many of their OH&S systems into the projects over-arching Safety & Health Management System due to its flexibility and being easy to operate and manage. Their intranet system is in my opinion best practice and provides all site personnel, managers and clients a concise and professional summary of events.

Their site managers and personnel are most professional and collaborative in their approach to their specific roles and responsibilities and their head office team is both supportive and focused on mutually beneficial outcomes from an OH&S perspective.

I am happy to recommend Geos Mining, to any potential client or business.

Yours faithfully,

Brendan J. Davies (Bach App Sc. Surveying, Grad Cert Project Management, SSE, Service Member QRC, Member AusIMM)
