

# TENEMENTS ADMINISTRATION

Australia Wide | Applications & Renewals | Native Title  
All Commodities | All Reporting Requirements

## Your tenement portfolio professionally managed

Geos Mining provides a full tenements administration service. We manage tenements throughout Australia in a variety of commodities ranging from gold and base metals to industrial minerals, bauxite and coal.

We maintain a tenements database that keeps data up-to-date, and avoids the risk of non-compliance by providing warnings of actions required. Our database currently holds 440 tenements which we have managed and monitored.

Our experience enables us to provide a quality and cost effective service that is designed to meet the requirements of a wide range of clients.

Services include:

### ▶ **Tenement Management**

Monitoring and managing tenements in accordance with Legislative requirements.

### ▶ **All Reporting Services**

Preparation and lodgement of tenement applications, renewals, reductions and transfers.

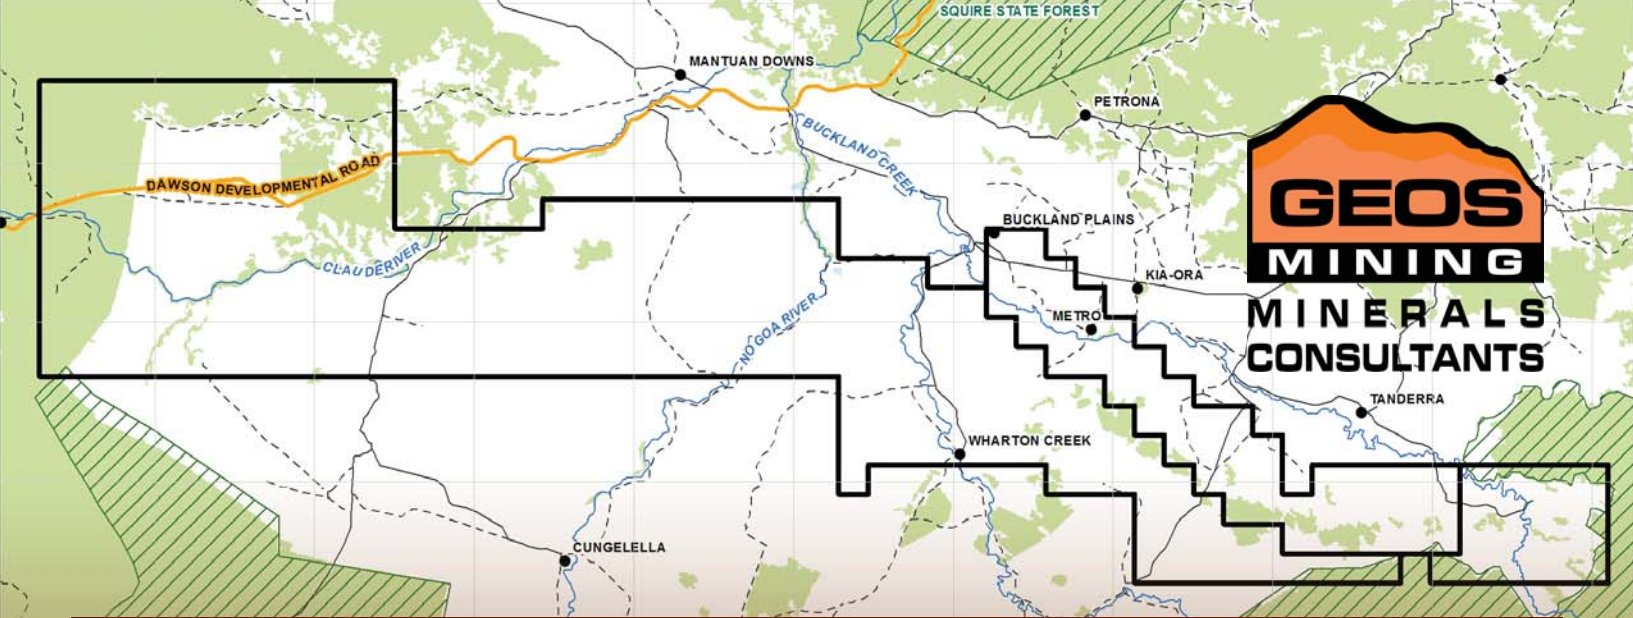

### ▶ **Native Title**

Statutory tenement reporting for government departments.

### ▶ **Joint Ventures**

Negotiating agreements, cultural heritage surveys and environmental agreements.

Negotiation and monitoring of joint ventures, options and access agreements.

## Some of our key clients

**ASF Group Unlimited** -- Justin Clarke, Director of Operations

*"Since early 2011 we have employed the services of Geos Mining and we are very satisfied with the quality of work they have produced and the timeliness of delivery. As ASF is a large group with many subsidiaries, it is often hard for consultants to manage so many different projects simultaneously however Geos Mining has always excelled."*
