

STRATEGIC MINERALS & URANIUM

Exploration Project Management | Resource & Reserve Estimations
Market Studies | Data Management | Independent Geological Reports
JORC and NI 43-101 Compliant Statements | Valuations | Due Diligence
Grade Control

Geos Mining employs Technical Specialists in a wide range of strategic minerals, including:

► Lithium

Trans Pacific Minerals Corp – Argentina (brine)
Mariana Resources / Litio Minera Argentina SA – Argentina (brine)
Kidman Resources Ltd – WA (pegmatite)
Orocobre Ltd – Argentina (pegmatite)
International Lithium Corp. – Argentina (brine)
Australian Salt Lake Potash – WA (brine & potash)
ERO Mining – SA (Lake Frome) (brine)
UXA Resource Ltd – NSW (Central West), SA (Gawler Craton) (pegmatite)
Sovereign Gold Company Ltd – Clayton River Valley, Nevada (brine)

► Market Studies

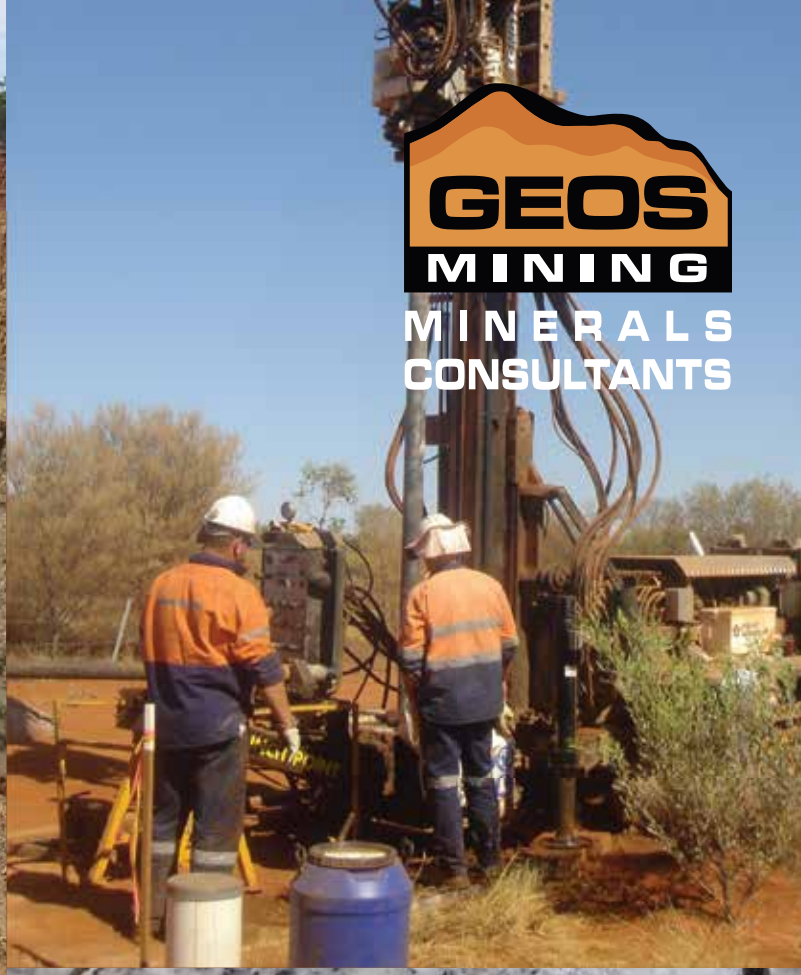

Market studies have been carried out for a number of strategic minerals of niobium, vanadium, and chromium. These have included reviews of world consumption, major suppliers (companies and deposits) and Australian opportunities.

► Fluorite

The Moina magnetite skarn deposit in Tasmania, Australia contains a number of potentially valuable minerals of fluorine, magnetite, tungsten and tin. Geos Mining assessed the potential to recover the minerals using a range of analytical tools including petrological work, QEMSCAN analyses and Davis Tube testwork.

► Uranium

BMA Asia – China General Nuclear Power Group - Kazakhstan
Uranium South Australia - SA (Eyre Peninsula)
Toro Energy Ltd - NT (Tanami), WA (Lake Mackay)
Cameco Australia Pty Ltd - WA exploration licences
Anchor Resources Ltd – QLD (Chillagoe region)
Ballimore Land Holdings Pty Ltd - NSW
Ark Mines Ltd - NSW
Oklo Uranium Ltd – West Africa (Mali)
U3O8 Ltd – WA (Ashburton), SA (Olary, Gawler Craton)

 CONSULTANTS

Experience

The Principal Consultant of Geos Mining, Sue Border, has International recognition as a specialist in industrial minerals and is a Competent Person in lithium resource estimation and reserves for pegmatite lithium.

Senior Consultant – Strategic Minerals, Lyle Sawyer, has extensive Australian and overseas exploration experience, including more than 10 years in lithium exploration. Lyle is a Competent Person in resource estimation of lithium brines, uranium, manganese and rare earth elements (REE). He holds a Master of Applied Science degree covering aspects of Engineering Geology, Hydrogeology and Environmental Geology.

Senior Consultant, Helen Ray has specialist experience in market research for specialty minerals.
